Our soldiers profited by this.

The Samush tried to destroy the flour supply by cutting open the bags, but much of this was saved by our troops, who are on very short rations, as they carried only about three days supply from Balquiri. The heat led many soldiers to discard their rations, as well as their clothing. The heat of the jungle-fonced road was swital, and especially to heavily-accounted men, and the path was lined with packets. Their shirts were discarded by hundreds, as well as blankets and haveracks. Several men were exthe cavally, and with General Lawler at the front, those two should keep any of the coemy's attention thoroughly en-gaged.

SPANISH REINFORCEMENTS.

If Pando Reaches Santiago the Campaign Will Be Prolonged.

Washington, June 24.—The news comes from Jamuica that General Pando is sending heavy reinforcements to the Spanish general Linares, in Santiago, is likely to have the effect of hastening the campaign against the town by the Americans. Pando has 10,003 soldiers at Holguin, less than 100 miles from Santiago. They are the pick of the Spanish army in Cuba and their covernment is known as They are the pick of the Spanish army in Cuba and their coramande, is known as the fighting general. Were they to combine with the Spanish force in Santiago, the American campaign would be very much protonged and the task set for our troops would be much heavier. Two factors have been relied upon to prevent this combination. The first is the very rough tailore of the country between Holguin and Santiago, which would be exceedingly lifficuit for troops to cover in less than four or five days at the earliest. The second is the active efforts of the Cubans to harrans the Spaniards on the march and return their movements. With the force they now have in that country, the Cubans could go this very effectually, but they could scarcely undertake to absolutely check the whole Spanish force of 10,000 men.

and of not being given to over many official reports. Not hearing from him, the officials were oblighed to rely upon press reports entirely for information. They found these highly satisfactory. Secretary Alger expressed particular gratinication at the news that the troops had reached a point within seven miles of Morro castle without encountering serious resistance. The direction taken by the troops after their landing at Baiguiriteneding generally westward—is taken in some quarters here to indicate a purpose to unite with Sampson's fleet in an attack on Morro castle and the other forts at the entrance of Santiago harbor before turning their attention to the low fixelf. Once the forts are captured, Sampson's miles for the stilled by the declaration of Marshal Martines at the entrance of Santiago harbor before a turning their attention to the low fixelf. Once the forts are captured, Sampson's miles and it, as reported the Merrimac does not completely obstruct the channel, some of the battleships may be sent in to deal with Cervera's squadron in its last resurt.
